

## The Fireray One

With no specialist tools or knowledge needed for installation and operation, the Fireray One is a standalone beam detector that prioritises ease of installation.

Using the Fireray One, it couldn't be easier to bring the benefits of beam detection to your application:

- One Minute Auto-Alignment<sup>™</sup> just steer the laser onto the Reflector, then at the flick of a switch, it aligns itself. 8 times faster than previous detectors
- One person installation everything can be done by one person
- One standalone product no specialist tools required; minimal prior knowledge and training needed

| Application         | Challenge                                                                                                     | The Fireray One                                                                                                         |
